Crude Fat	%	2.00
Carbohydrate	%	56.00
Calcium	%	0.80
Phosphorous	%	0.30
Sodium	%	1.00

FAQ'S

When should I use this product? Generade Pellet is designed for use in the lead up to transport, processing, yarding, shearing, or any other event that may cause stress. For best results treat animals at least twice during the 24 to 36 hours prior to the stress event.

How much Generade Pellet should I use? The Pellet is designed to be fed at the rate of 750 grams per cattle per day, or 280 grams per sheep per day, and may be fed on its own or mixed with hay or grain. To optimise the productive benefit, we suggest you speak to an Accredited A.I.M. Advisor.

How do I mix the Pellet with grain? The most effective way to mix the Generade Pellet with grain is via a vertical paddle or ribbon mixer. This will ensure even distribution of the Pellet through the mix. If you don't have a mixer, adding Generade Pellet at a proportional rate to grain as it is being augered can often be quite successful, however care and diligence is required in order to ensure even distribution.

Does Generade Pellet contain products that limit/prevent grain poisoning? Yes. Generade Pellet contains Buffers - compounds that help to control or prevent Acidosis. However due care during Feedlot Induction and Feeding is a critical part of managing the risk associated with Acidosis.

Can I add other additives to the grain ration whilst using Generade Pellet? Yes, but this is usually completely unnecessary and may often reduce the effectiveness of the Pellet by upsetting the nutrient balance it contains. We strongly suggest that you discuss your options with an Accredited A.I.M. Advisor before proceeding with including additional additives to the grain diet.

When mixing Hay with Generade Pellet, what quality of hay should I use? The quality of the hay is not critical, however we suggest that you ensure it is clean, dry and does not contain mould or contaminants.

SPECIFICATION SUBJECT TO CHANGE

This custom Vitamin & Mineral Supplement should only be used in conjunction with advice from an Accredited A.I.M. Advisor. The use of the product being beyond the control of the Seller/Manufacturer, no warranties, statutory or otherwise, are expressed or implied, and no responsibility will be accepted by the Seller/Manufacturer for any damage whatsoever arising from its application or use.
